

APPENDIX

Supplementary Figure S1. Morphological adaptation of G22 rice plants grown under different culture conditions. P₀ (full Pi), P* (low Pi), P+ 113 (insoluble Pi supplemented with *Burkholderia* sp. strain 113), P+ 205 (insoluble Pi supplemented with *Burkholderia* sp. strain 205). RTL (root length), SHL (shoot length), NCR (number of crown root), RTW (root weight), SHW (shoot weight), TTW (total weight). Different letters indicate significant differences between treatments ($p < 0.05$).

Supplementary Table S1. List of primers were used to amplify the genes related to Pi responses by qRT-PCR

Supplementary Table S2. Variation of amino acid content (mg/g dry weight leaf) from leaves of G22 plants grown in different phosphate culture conditions. P0 (full Pi), P* (low Pi), P+ 113 (unsoluble Pi supplemented with *Burkholderia* sp. strain 113), P+ 205 (unsoluble Pi supplemented with *Burkholderia* sp. strain 205). Different letters indicate significant differences between treatments ($p < 0.05$).
